1 | The dispute over Yucca Mountain represents a problem larger than itself. Yes,
| we do need a place to put this waste. But in the future, we should have a
| plan in place to deal with these wastes before they are produced. It's
| simple, make those who produce the waste have a plan for what to do with it
| before they create it. If there is no place to put it, or no way to dispose
| of it, don't let it be produced.
